Fast-track your Graduate Careers

The EarthCheck Graduate Training Program provides teaching institutions, corporate universities, training providers and students with practical knowledge and skills to meet the challenges of the Green Economy.

The training program provides students with real world examples, tools, templates and case studies which provide a basic understanding of responsible business practice, global reporting expectations for environmental and carbon footprint analysis and specialised knowledge in key areas associated with energy, water and waste management as well as supply chains.

The training modules are presented in a practical, engaging and interactive manner and can be incorporated into any corporate, tourism or hospitality management training course.

EarthCheck Graduate will not only enhance your organisation’s reputation as an innovative leader in sustainability and environmental education but create leaders of the future.

“We are excited to be able to use EarthCheck’s resources to give students real world experience in sustainable tourism management. Our students will get hands on knowledge of state-of-the-art measurement tools and access to current information. It takes the theory of sustainability and makes it real.”

Dr Jonathon Day
Associate Professor
Hospitality and Tourism Management
Purdue Tourism and Hospitality Research Center
Included in the EarthCheck Graduate package is:

- An EarthCheck Graduate Workbook for each student in the course, including activities and case studies;
- Sustainability tools, templates and resources;
