Become a Sustainable, World Class Ecotourism Operator

EarthCheck ECO and ECO-Certified is a dedicated suite of accreditation programs for Ecotourism operators operating in both Terrestrial and Marine Parks. They are aligned to the Global Sustainable Tourism Council’s (GSTC) Sustainability Criteria, recognised by the Great Barrier Reef Marine Park Authority (GBRMPA) and Queensland Parks and Wildlife Services (QPWS) and provide opportunities for businesses to extend their operating permits.

The program will showcase to participating operators how EarthCheck can assist their team to measure, organise and report their environmental and social management processes across the business. The program will require the operator to measure, monitor and make ongoing improvements in the key performance areas including:

- Energy Consumption,
- Greenhouse Gas Emissions,
- Potable Water Consumption
- Waste Sent to Landfill
- Community Commitments

EarthCheck ECO

EarthCheck ECO offers multiple options for businesses of all sizes wishing to maintain and report on their sustainability practices and identify areas of improvement through access to internationally accepted criteria and benchmarks. These practical and easy-to-use programs are delivered online and are perfect for park operators who want to track and improve their triple bottom line performance.

EarthCheck ECO-Certified

EarthCheck ECO-Certified will assist management teams to measure, organise and report their environmental and social management processes across the organisation. By measuring their operational performance, the program will enable the team to manage their outcomes and set priorities to achieve bigger operational efficiencies which can lead to operational cost reduction and a minimisation of their environmental footprint.

Benefits of the Standard:

Operational
- Reduced operating costs
- Understanding of potential risk exposure
- Delivery of bottom line results
- Helps enterprises to identify weaknesses and opportunities

Marketing
- Environmental leadership
- Provides assurance that claims are genuine
- Enables sustainability to be promoted as a market asset

Staff and community
- Increased staff morale and motivation
- Provides a basis for building sustainable destinations

Reporting
- Provides a basis for CSR reporting
- Provides a reliable basis for Greenhouse Gas (GHG) reporting
- Provides confidence in compliance reporting
