EARTHCHECK SUSTAINABLE DESIGN ACCREDITED PROFESSIONAL

Welcome to our design professional development program

The need to identify qualified professionals who have the knowledge and skills to integrate sustainability thinking and action into the design, construction and operations of the built environment is growing significantly.

The EarthCheck Sustainable Design Accredited Professional (ESDAP) course focuses on the application of the EarthCheck Building Planning and Design Standard (BPDS), the business case for holistic sustainable design, certification process and practical exercises.

Learning outcomes include:

- Gain an overview of the EarthCheck BPDS and the associated services and tools included in program;
- Recognise the impact that the EarthCheck BPDS has on the environment and community – thinking beyond the development phase;
- Recognise the impact that the EarthCheck BPDS has on project teams and developers;
- Understand the business case for clients achieving EarthCheck Sustainable Design Certification;
- Understand the application of the EarthCheck BPDS to different types of built assets;
- Provide guidance and technical support to projects on fulfilling the requirements of the EarthCheck BPDS;
- Provide guidance on documenting and collating supporting evidence for submission; and
- Obtain an industry recognised skillset allowing the ESDAP to guide projects through the EarthCheck Sustainable Design Certification process.

Benefits

The ESDAP Qualification equips building professionals to work with stakeholders and EarthCheck Sustainable Design tools. Individuals who have achieved ESDAP status have unique benefits which include the following:

- **Recognition of Leadership and Expertise in EarthCheck Sustainable Design Certification.** Becoming a qualified ESDAP means professionals have taken time to understand the tool, why it is important and how it will assist you in supporting more sustainable outcomes for your clients.
- **Futureproofing careers.** With over 1,000 clients across 70 countries, demand for EarthCheck qualified professionals continues to grow.
- **Demonstration of commitment to ongoing professional development.**

EARTHCHECK SUSTAINABLE DESIGN ACCREDITED PROFESSIONAL

ESDAP Online Course

Date: 6–7 November, 2018

Costs: The ESDAP course costs AUD\$500 per person

The course fee includes:

- Tuition and training notes
- Technical manuals and Standard
- On-line exam,
- Certificate of achievement
- Access to the EarthCheck Community

Email
design@earthcheck.org
to register your interest.

The ESDAP course consists of lectures, case study, exercises, Q&A. When the course is completed, you will be encouraged to sit the ESDAP exam to become an EarthCheck Sustainable Design Accredited Professional.

Training Course Outline:

General Introduction

- Introduction to EarthCheck and course expectations
- Overview of EarthCheck Sustainable Design Accredited Professional credentials
- Exam Format

EarthCheck Building Planning & Design Standard (BPDS)

- History and Purpose
- Roles and responsibilities during the certification process
- Outlining mandatory and additional requirements for Certification
- Certification outcome differentiation (Ratings)

BPDS Key Performance Areas and Requirements

- Sustainability Approach
- Energy
- Water
- Solid Waste
- Land use Planning & Biodiversity
- Sustainable Materials & Resource Conservation
- Indoor Environmental Health and Pollution Control
- Transport
- Social, Cultural and Economic Well-being
- Innovation

Case studies of excellence
