## RECOMMENDED ACTIONS

### POTABLE WATER CONSUMPTION
1. Switch to a sustainable source of freshwater.
2. Implement a program to ensure water conservation as much as possible.
3. Implement a regular maintenance schedule for water devices, pipes and systems.
4. Install low/dual flush toilets to reduce your water consumption.
5. Install low flow tap/faucet fittings to reduce your water consumption.
6. Leaks and water monitoring factsheet
7. Reducing water consumption (I) factsheet
8. Reducing water consumption (II) factsheet
9. If you would like personalised advice on fresh water management strategies, please contact Earthcheck.

### CO₂ (SCOPE 1 AND SCOPE 2)
1. Adopt a commitment to the reduction of greenhouse gas emissions by reducing your energy consumption.
2. Aim to reduce and/or cease the release of ozone depleting substances, particularly refrigerent gases from older refrigeration and air conditioning systems to the atmosphere.
3. Implement a program to offset the carbon generated in greenhouse gas emissions through carbon sequestration by, for example, forest planting.
4. Energy & emissions factsheet
5. Voluntary carbon offsetting factsheet
6. If you would like personalised advice on greenhouse gas emission management strategies, please contact Earthcheck.

### COMMUNITY COMMITMENT
1. Employ local people, including considering employing local people for management positions.
2. Sustainable Communities
