

START
Get started by enquiring at earthcheck.org

STEP ONE

Commitment & policy

Let's assess your current state. Complete the Self-Assessment Checklist, available online through MyEarthCheck. This reviews your current sustainability initiatives and performance across:

1. Sustainability & Energy Efficiency Policy
2. Benchmarking & Performance
3. Governance
4. Sustainability & Energy Approach
5. Communication

STEP TWO - OPTIONAL

OPTIONAL: Data upload & diagnostic

You can easily upload your operational data to MyEarthCheck, including energy use, water use and waste.

Whilst this is not required to achieve an Earth Rating, it will help you to:

- ✓ Access performance
- ✓ Identify opportunities
- ✓ Prioritise critical issues
- ✓ Produce a Carbon Footprint Report

STEP THREE

Verification

Once the diagnostic is complete, simply submit your responses online for verification.

You can also choose to organise an onsite audit by a third party assessor, in order to receive a digital certificate as well as your Earth Rating logo.

RENEW OR UPGRADE
Continue to maintain and grow your Earth Rating, or upgrade to EarthCheck Certified to become a market leader in sustainability!

STEP FIVE

Outcomes

In order to improve your rating, re-submissions can be made multiple times throughout the year, helping you to:

Understand your energy, water, and waste consumption compared to your competitors

Ensure business continuity

Report on carbon

Identify compelling initiatives

Identify operational risks

Demonstrate business transparency

Strengthen your control processes

Improve brand image

STEP FOUR

Achieve

After verification, EarthCheck will provide an overall rating based on your self-assessment.

You will then receive an achievement logo denoting your rating out of 5. If you have completed an onsite audit, you will also receive a digital certificate.
